

Damon Self

damongself@gmail.com | [GitHub](#) | [Medium](#) | [LinkedIn](#)

Full stack web developer passionate about creating web applications that positively affect consumers. My background in logistics drove me towards web development for the purpose of improving software used by consumers. With strong skills in communication, problem analysis, and emotional intelligence I strive to use my technical skills for companies that prioritize the user's experience by creating projects with team driven Agile development.

TECHNICAL SKILLS

- ES6 Javascript, React, Ruby on Rails, Ruby, Webpack, Babel, Express JS, Git, HTML / CSS, Logistics, Node JS, Phaser, PostgreSQL, SQL, SQLite3, Tiled

TECHNICAL PROJECTS

Self Portfolio - [GitHub](#) | [Demo](#)

Innovative autobiography in an easily accessible format.

- Has Webpack implementation for bundling code and assets for production.
- Written in ES6 Javascript with HTML5 and CSS3.

Magic the Gathering Deckbuilder - [GitHub FE](#) | [GitHub BE](#) | [Demo](#)

Step up and test your deck building skills free of charge.

- Makes use of React to create an interactive interface for viewing and creating deck lists.
- Applies React Router to simulate page changing features and retain back/forward arrow functionality
- Employs Rails to create and store users, cards, and decks.

Hike Finder - [Github](#)

A concise layout of local Denver hikes that you can save for later.

- Implements Rails in the backend for storing hike and user data such as favorite hikes
 - Stores hike data from the REI Hiking API using RestClient in the backend
 - Utilizes Javascript on the front end to fetch stored data from the backend and displays it
-
